

Cutting-Edge Digital and AI-Powered Pathology Services

As a leading CRO, CellCarta provides the latest in histopathology services. Expert pathologists, customized assays, and comprehensive data analysis employing top-tier technologies to propel your clinical trials. We support your studies through our global CAP/CLIA accredited laboratories.

Skilled In-House Pathologists

Our trained team of **>30 in-house pathologists** has years of experience in cytopathology, hematopathology, and dermatopathology, and delivers high-quality and customized tissue scoring.

Extensive Histopathology Services

CellCarta offers **>200** IHC and **>70** mlHC, IF and ISH/FISH assays. Our laboratories support programs with all key diagnostic partners: Agilent, Roche/Ventana and Leica, to cater to all your clinical study needs.

Digital Image Analysis

CellCarta has mastered the art of digital image analysis. Our complete workflow, supported by histoscientists and pathologists using the latest digital scanners, ensures quality and optimal clinical insight.

Cutting-Edge Analysis Solutions & Image Management Platforms:

- **Brightfield and fluorescent scanning technologies:** 3DHistech, Akoya, BioView, Leica Biosystems (Aperio®), Rarcety, Roche/Ventana and Zeiss
- **Key digital image analysis software and AI capabilities:**

VISIO  PHARM®

inForm®, CyteHub®, Solo
Web, navify® by Roche

CellCarta's histopathology services provide experts, leading platforms, and the confidence needed for tissue biomarker strategies in clinical trials.
