

comprehensive flow cytometry analysis software

Unmatched Performance

Analyze thousands of samples or multi-gigabyte deep phenotyping data in record time

Advanced Visualizations and Algorithms

Create statistical charts and heatmaps, run algorithms in minutes instead of hours

Metadata-Driven

Use your experimental conditions to tailor your analysis and visualizations

21 CFR 11-Compliant

Fit for use in clinical research

New! CyTOF™ Cleanup Tool

Developed in partnership with Standard BioTools, the CyTOF cleanup tool automatically gates viable singlet cells and generates a QC report in seconds
